Answer the following questions using C#:

Question 1

1- Write a code to create a linked list of integers (elements).

2- Delete a given integer from the linked list.

3- Display the contents of the linked list after deletion.

Question 2:

1- Create 100 random integer numbers in an array named **ARR**.

2- Given a number **x** that may occur several times in the array, find the number of

   occurrences of **x** in **ARR**. Use one of known search algorithms.

All the best wishes,

Dr. Heba El Hadidi
